PROFESSIONAL SUMMARY

B.Tech graduate and Application Developer with hands-on experience in Python full-stack development (4-month training: Python, Flask, MySQL, HTML, CSS, JavaScript, React JS). Skilled in OOP, relational database design, and building and debugging end-to-end applications. Quick learner and adaptable professional comfortable collaborating in cross-functional team environments.

TECHNICAL SKILLS

Languages & Web: Python, JavaScript, HTML, CSS, React JS, Flask, REST API concepts
Core Concepts: Object-Oriented Programming (OOP / OOPs), DBMS, Data Structures
Databases: MySQL, SQL (Joins, Views, Stored Procedures, Constraints)
Tools & Platforms: Git, GitHub, VS Code, Linux (Basics)
Engineering Practices: Problem Solving, Debugging, Code Review Practices, Agile Teamwork

EXPERIENCE & TRAINING

Codegnan — Python Full-Stack Development Trainee 4 Months

- Completed an intensive full-stack development program covering Python core, Flask backend services, MySQL architecture, and modern front-end engineering (HTML, CSS, JavaScript, React JS).
- Engineered, integrated, and debugged full-stack applications combining Flask REST back-end logic with React JS interfaces and relational MySQL database operations.

KEY PROJECTS

Helpdesk Ticketing System | MySQL, SQL, Relational DBMS github.com/Yashwanth-Mirapala

- Designed and normalized an end-to-end relational database modeling users, tickets, support technicians, and departments with explicit schema integrity constraints.
- Authored advanced SQL queries, joins, reporting views, and stored procedures to streamline ticket workflows and automate analytical reporting.

ATM Management System | Python, OOP, File Handling github.com/Yashwanth-Mirapala

- Developed a console-driven banking simulation utilizing OOP principles for secure pin authentication, balance inquiries, fund deposits, cash withdrawals, and mini-statements.
- Structured logic into modular, maintainable packages with robust exception handling and persistent data tracking.

IoT-Based Smart Monitoring System | Hardware & Cloud Integration github.com/Yashwanth-Mirapala

- Collaborated in an engineering team to design, program, and validate an embedded monitoring system aggregating real-time sensor streams and uploading telemetry to the ThingSpeak cloud platform.
- Contributed to debugging network packet delivery and improving overall hardware-software communication reliability.

EDUCATION

Bachelor of Technology (B.Tech)
Vishnu Institute of Technology, Bhimavaram

CERTIFICATIONS

• **Python Programming** Codegnan
• **MySQL & Database Management** Codegnan
• **Web Development (HTML/CSS/JS)** Codegnan

CORE COMPETENCIES & SOFT SKILLS

Communication Problem Solving Team Collaboration Quick Learning Adaptability Time Management
Code Review
